

This is the fourth year that we are presenting Integrated Annual Financial Statements to our stakeholders. Staying true to the concepts of integrated reporting, this year too, we have presented our Financial Statements, including the relevant Notes to Financial Statements in a comprehensive and integrated manner.

From the year 2013, this attempt in integrating the Financial Statements section has undergone continuous improvement. This year too, we have improved our presentation, based on self-initiatives as well as externally prescribed best practices. Accordingly, whilst adhering to all applicable regulator specified guidelines, we have presented each Note to the Financial Statements, duly preceded by the applicable accounting policy. This presentation method provides greater integration of related and relevant information. Furthermore, the user-friendliness of the Financial Statements has led to improved efficiency in the usage of Financial Statements.
